GHANSHYAMDAS JALAN COLLEGE OF SCIENCE, COMMERCE AND ARTS

COMPUTER SYSTEMS AND APPLICATIONS

TYBCOM SEMESTER VI

1) The full form of SET in E-commerce is _____
   a)   Secure Electronic Tax
   b)   Secure Electronic Transaction
   c)   Secure Electronic Territory
   d)   Secure Electronic Tunnel

2) Commercial transaction done with the help of cell phones is called _____
   a)   E-Commerce
   b)   M-Commerce
   c)   E-Business
   d)   Sales.

3) Criminally acquiring password is called _____
   a)   Encryption
   b)   Public key
   c)   Hacking
   d)   Decryption

4) In Online stored value systems, cards that have embedded chip that store personal   information   is   called _____
   a)   Credit Card
   b)   Smart Card
   c)   Debit Card
   d)   Chip Card

5) In _____ Revenue model, Revenue is generated from sales of goods, information or   services.
   a)   Affiliate
   b)   Sales
   c)   Transaction
   d)   Advertising

6) Generally common is familiar with _____ from of E-commerce.
   a)   B2B
   b)   P2P

c) B2C

d) C2C

7) It is convention that all sites that use SSL connection while making secure connection use _____instead of HTTP.

a) SMTP

b) HTTPS

c) FTP

d) TCP/IP.

8) _____ is online store retail store.

a) Portal

b) Service Provider

c) E Tailer

d) Content Provider.

9) Decryption refers to

a) Converting plain text into binary numbers

b) Converting plain text to cipher text

c) Converting cipher text to plain text

d) Converting binary numbers into plain text.

10) SSL does not provide

a) Integrity

b) Data Security

c) Authentication

d) Confidentiality

11) BitTorrent.com is an example of _____

a) B2B

b) B2C

c) C2C

d) P2P

12) E-Tailer revenue model is _____ revenue.

a) Sales

b) Subscription

c) Advertising

d) Affiliate

13) The sender and receiver will have the same key in _____ key Encryption.

a) Symmetric

b) Asymmetric
c) Public
d) Private

14) A computer to computer exchange of business transaction is called
a) E- Commerce
b) EDI
c) E-Market
d) M-Commerce

15) In E-Commerce the assurance that the message is not altered is known as
a) Authentication
b) Confidentiality
c) Integrity
d) Validation

16) The most commonly used form of payment in E-Commerce is
a) Credit Card
b) PayPal
c) Petro Card
d) Digital Cash

17) There are many techniques that B2C companies use to attract customers except
a) Registering with search Engines
b) Viral Marketing
c) Online Ads
d) Virtual Marketing

18) Which term describe the percentage of people who visit a website and buy something
a) Affiliates
b) Click-Through
c) Spam
d) Conversion Rate

19) Buying and selling goods and services over the internet is called.
a) E- Market
b) EDI
c) E-Commerce
d) Internet –Commerce

20) E-Commerce means
a) Buying and selling

b) Buying and selling over the internet

c) Accounting on the internet

d) Surfing on the internet

21) When you are typing a formula in a cell. The first things that must be entered is :

a) The first cell referenced

b) Parenthesis

c) Quotation Marks

d) An Equal Sign

22) When referring to a cell in another worksheet (same Workbook), the sheet reference is always _____, while the cell reference may be _____.

a) Absolute, relative

b) Relative, absolute

c) Mixed, absolute

d) Relative, mixed

23) Excel templates have the file name extension

a) .temp

b) .xltx

c) .xtemp

d) .xls

24) A selection consisting of two or more cell on a worksheet is called

a) Area

b) Unit

c) Range

d) Name

25) The result of logical formula is

a) A logical value True or False

b) A text Value

c) A numeric Value

d) An Error Message

26) If a cell A3 contain 10 and cell A4 contain 15, then what is the return value of the formula =AND(A3 > 9, A4 < 120)?

a) TRUE

b) FALSE

c) 25

d) -5

27) Which type of charts can Excel produce?
- a) Line graphs and pie charts only
- b) Only line graphs
- c) Bar chats, line graphs and pie charts
- d) Bar charts and line graphs only

28) Which of the following functions can be used to find a character starting from the starting of a string argument?
- a) =LEFT()
- b) =MID()
- c) Either =LEFT() or =MID()
- d) =RIGHT()

29) The _____ function obtain its time and date from the computer's clock:
- a) TODAY()
- b) NOW()
- c) CURRENT()
- d) DAYS360()

30) In a range consisting of 10 numbers, which of these formula will return the 5th largest number?
- a) LARGE(A1:A5, 5)
- b) LARGE(A5:A10, 5)
- c) LARGE(A1:A10, 5)
- d) LARGE(5, A1:A10)

31) What will be the result according to this formula : =FIXED(1234.363,-1)
- a) 1234.3
- b) 1234
- c) 1230
- d) -1234.363

32) What will be the result of =Count(4,5,6,9,"Ravi")
- a) 4
- b) 5
- c) 6
- d) 9

33) What will be the result according to this formula : =PROPER("THIS IS EXCEL")
- a) this is excel
- b) This is Excel
- c) This Is Excel

d) This is excel

34) AutoFilter feature allows the user to:
   a) Copy data that matches a criteria into another worksheet
   b) Display data that matches certain criteria
   c) Delete data that matches a criteria
   d) Perform calculations only on selected data

35) A scenario uses all of the following except:
   a) Changing cells
   b) A table Area
   c) Result cell
   d) Formulas

36) You want to track the progress of the stock market on a daily basis. Which of the   chart should be used?
   a) Bar chart
   b) Pie chart
   c) Line chart
   d) Column chart

37) Which of the following is the correct syntax for the COUNTIF function?
   a) =COUNTIF(criteria, field _name, list_range)
   b) =COUNTIF(criteria, field _range)
   c) =COUNTIF(field _range, criteria)
   d) =COUNTIF(list_range, field _name, criteria_range)

38) In a range consisting of 10 numbers, which of these formula will return the largest number?
   a) SMALL(A1:A10, 1)
   b) SMALL (A1:A10, 10)
   c) SMALL (1, A1:A10)
   d) SMALL (10, A1:A10)

39) What will be the result according to this formula : =UPPER("this is excel")
   a) THIS IS EXCEL
   b) This is Excel
   c) This Is Excel
   d) This is excel

40) If we want a macro be available in all workbooks it should be stored using which of   these options?
   a) This workbook
   b) New Workbook
   c) Personal Macro Workbook

d) Public Macro Workbook

41) When two or more values have to be determined, which data analysis tool is used?
   a) Solver
   b) Goal Seek
   c) Bar Chart
   d) Data Table

42) Which formula can add the all the numeric values in a range of cells, ignoring those which are not numeric, and place the result in a different cell?
   a) COUNT()
   b) COUNTIF()
   c) SUM()
   d) AVERAGE()

43) Which of these tools is used to perform the What-if analysis?
   a) Scenario Manager
   b) AutoComplete
   c) AutoFill
   d) Filtering

44) What chart object is horizontal or vertical line that extends across the plot area to   make it easier to read and follow the values?
   a) Category axis
   b) Data marker
   c) Data point
   d) Gridline

45) What will be the result according to this formula : =DATEVALUE("1-Jan-1900")
   e) 1
   f) 40178
   g) 43452
   h) 32

46) After recording a macro you can modify it using
   a) The Visual Basic editor
   b) The macro security feature of Code Group
   c) Modify macro feature of code group in developer tools
   d) Macros → Edit in the Code group of Developer

47) The chart Wizard
   a) Can place a chart on new chart sheet or on any sheet in the workbook

b) Can only place a chart on a new chart sheet

c) Can only place a chart on a new blank worksheet

d) Can only be used to create embedded charts

48) The intersection of a worksheet row and column is called a

a) Range

b) Cell

c) Pointer

d) Box

49) The last cell in excel Worksheet is?

a) 100

b) IV

c) XFD

d) VI

50) A Workbook may consist of multiple:

a) Worksheet

b) Files

c) Folders

d) Disks

51) Cell references which change when they are copied are known as:

a) Relative references

b) Absolute references

c) Periodical references

d) Temporary reference

52) Which of the following gives the reference operator for union of ranges?

a) !(Exclamation Mark)

b) :(Colon)

c) Space

d) ,(Comma)

53) What is the purpose of the COUNTA() function?

a) It determine the number of cells in a range

b) It determine the number of empty cells in a range

c) It determine the number of filled cells in a range

d) It determine the number of columns in a range

54) A cell A1 contains the following data: MUMBAI-400020. We want to store the   PINCODE   separately in another column, say column B1. Which of the following function is most appropriate?

a) LEFT(A16)
b) RIGHT(A1, 6)
c) MID(A1, 8, 6)
d) Either (b) or (c)

55) What is the result of function =LEN("GHANSHYAMDAS")
    a) 10
    b) 11
    c) 12
    d) 1

56) Each program developed in Visual Basic is called a:
    a) Program
    b) Form
    c) Macro
    d) Project

57) The reference library of Visual Basic books in called:
    a) MSDN Library
    b) Help Library
    c) Contents
    d) Topic Pane

58) Which of the following is a not part of the Visual Basic IDE?
    a) Code Window
    b) Properties Window
    c) Project Explorer
    d) Data Grid

59) Double clicking on the command button icon in the tool box will:
    a) Do Nothing
    b) Highlight it
    c) Move it to the form
    d) Place it on the form

60) The prefix for naming a menu item is _____
    a) m
    b) mnu
    c) men
    d) mne

61) Which of the following is a valid object name for a text box?

a) txtClass

b) txt Class

c) txt+Class

d) cmdClass

62) The application name always appears in the _____ window:

a) Project Explorer

b) Intermediate window

c) Title Bar

d) Properties window

63) the elements of user interface are:

a) Project and Module

b) Forms and controls

c) Toolbox and toolbar

d) Help Library

64) Which is not applicable to Visual Basics :

a) Event driven programming concept

b) Rapid Application Development

c) Create application with GUI

d) Structural Procedure

65) Variables can not be shared by different procedures of a program if they are _____

a) Declared as global variables

b) Passed by reference

c) Passed by Value

d) Declared as local variable

66) The syntax for declaring a variable in VB is

a) Dim variablename

b) Dim variablename [As Type]

c) Either a or b above

d) Variablename

67) The data type that hold the numeric variable with values ranging from 0 to 255 is

a) Byte

b) Boolean

c) Single

d) Integer

68) Which of the following statements is the correct way to declare a constant TAXRATE that stores the value 0.30?

     a) Const TAXRATE As Single = 0.30
     b) Const TAXRATE As Single 0.30
     c) Const TAXRATE = 0.30
     d) TAXRATE = 0.30

69) Relational operator for "Not Equal to" is

     a) !=
     b) <>
     c) =Not
     d) Not=

70) '^' is the operator for performing the arithmetic operation.

     a) Addition
     b) Multiplication
     c) Subtraction
     d) Exponentiation

71) What is the final keyword used to indicate the end (Compilation) of a sub procedure?

     a) End Sub
     b) Exit Sub
     c) End
     d) Exit

72) The _____ Loop is ideal for situations that require a counter because it is specifically designed to initialize, test and increment a counter variable.

     a) Do While
     b) Do Until
     c) Pretest Do Until
     d) For – Next

73) _____ contain the controls which one can use in the creation of a form.

     a) Menu
     b) Tool Bar
     c) Tool Box
     d) Project Window

74) Visual Basic controls are:

     a) Code
     b) Part of the menus
     c) Rules

d) Objects

75) In VB Project the Form design is carried out in the _____ window.
 a) Properties
 b) Tool Box
 c) Project Explorer
 d) Form window
