

'My Experience With Online Lectures'

In this essay, I am narrating my experience with online lectures. Today, to prevent the spread of Coronavirus, many College are conducting online lectures. I feel happy to study online, but sometimes I miss my teachers and my classmates as well.

Every year my College reopens on the 1st of June. But this year, due to the spread of Coronavirus, my College remains closed. But yet, the teachers are conducting online classes for us. Every morning, they instruct us to complete certain activities within the specified period on the Meet app. They also conduct videoconferencing sessions twice a week. I have uploaded the video software on my system and I can attend the online class.

My teacher invites us for video conferencing thrice a week and twice a day. We are taught two different subject on this day. Early in the morning at 9 a.m, I log in to my account and use the option 'Join meeting'. Then I see my teacher then, I also view my other classmates.

Our class teachers opens the register in the classroom and takes our attendance. Then she explains us the respective chapters from the book. After explaining the lesson, she provides notes of the chapters to us. Then, we copy the notes. So, at 10 a.m. we complete our online session and then we take a break for sometime.

At home I sit down comfortably on my chair and can place my books on the tables. My study room is beautiful with many wardrobes and cabinets. I can place all my books in my cabinet and take them whenever I want. As I can loiter on the large soft carpet in my study room whenever I feel bored and look out of the window. Outside the window, I see the birds flying in the sky and sometimes the monkeys jumping from tree to tree. I also meet my mother and interact with her for some time.

But yet, the actual classroom experience is unique. Every day at 8.30 a.m. I was standing in the assembly and praying with the other students. After every lectures, we stood in our places and wished teachers 'Good morning' or 'Good Afternoon'. Then, they wished us back and instructed us to sit down in our places. Every month, they conducted some contests and we participated in the contests.

Date 10/2/21

During the lunch break, we sat down along with our friends under the tree and ate our lunch.

Finally, online lectures fit my lifestyle, because I am not a traditional student. If given a choice I would take all of my classes through the Internet. Online lectures have saved me money and time. And it allows me to be a full time student. The only drawback for me was when my computer crashed. Other than that my experience with online classes has been a rewarding, learning experience.

So, although I can enjoy the comfort at home, I feel lonely too. And this is lot of fun, and it gives me ideas for my assignments. This is a learning experience for my whole family. And also, I am spending time with my family; which is difficult for a non-traditional student.
