## About The National Webinar

The pandemic Covid-19 has brought unprecedented changes in economic and social aspect. As we have already acknowledged that India is a developing economy, it is stated as an economy passing through demand depression and high unemployment. The Indian economy will have to face some challenges. These include volatility and precipitous fall in financial markets and commodity prices, and financing gap due to shrinking fiscal revenues. Liquidity crunch, disruptions in international trade, and transport, depletion of foreign exchange reserves, devaluation of their currencies, fall in export revenues due to export controls and contraction in global markets and economic engines also causes for concern. The other side of the coin, the impact of Covid-19 definitely changes our social and economic structure, creating some market opportunities also.
