### Abstract

*Globalization has effected dramatic changes in social, economic and cultural habits of people the world over. In era of globalization, even the education structure is changing. Since accumulation of knowledge is not restricted by distance, the students community have benefited from globalization. With globalization, India will attempt to bring the best foreign universities here and due to competition with these foreign education providers our own institutions will strive to raise their quality and standard of education. This will on one hand, reduce the charm of going abroad, and may attract foreign students to our shores, on the other. But all this would require reforms in our education system, increased use of information technology, and more emphasis on research and developmental activities. The paper examines how India can benefit from globalization of higher education.*

**Keyword:** globalization, higher education

### Objectives of the Study

The following are the main objectives of the present study:

- 1) To explain the term 'globalization' and its implications for higher education.
- 2) To study Foreign Education Institutions Bill 2010.
- 3) To take note of how other developing countries are coping with GATS.
- 4) To identify the likely benefits as well as risks for our educational system.
- 5) To highlight the need for a strong regulatory and monitoring mechanism for foreign providers of education.

### Methodology of the Study

The author conducted his research studies on the basis of secondary sources of data. The methodology of the study also includes the thoughts and writings of various authors in the stream of academic, research & corporate industry.

### Introduction

Many nations' economy were destroyed as a result of World War II. The General Agreement on Tariffs and Trade (GATT) was established in 1948 by 23 nations with the goal of reviving their ailing economies (GATT). The General Agreement on Tariffs and Trade (GATT) was abolished in 1995 and replaced with the World Trade Organization (WTO), It was originally signed by 118 nations, but the number of signatories increased to 144 countries later on. The GATS encompassed 116 services, which included higher educational institutions. In accordance with the GATS, its members are required to decrease public spending on education since it amounts to an unfair subsidy. An exemption from GATS must be given completely free of charge—that is, it must be fully funded by the government. The majority of nations throughout the globe, including India, do not have complete public authority over their educational systems. Organizations from both the public and private sectors coexist. As a result, the GATS regulates all aspects of education. Tariffs, visa restrictions, and other trade barriers, among other things, must be eliminated by the governments. India, as a member to the World Commerce Organization and the General Agreement on Tariffs and Trade, is obligated to open its educational market to foreign trade, since higher education in India is not provided free of charge. Students are required to pay tuition in order to get an education. The International Trade Organization and the General Agreement on Trade in Services (GATS) have successfully globalised world economies. Globalization has ushered in the free movement of commerce, technology, information, and other goods and services across nations. The primary goal of the GATS is to establish an open, global market in which services such as education may be sold on the same terms as any other commodity.
